This article is adapted from his book *The Asian Energy Factor: Myths and Dilemmas of Energy, Security and the Pacific Future* (New York: St. Martins Press, 2000). *Survival*, vol. 42, no.3, Spring 2000, pp. 73-88 © The International Institute for Strategic Studies 74 Robert A. Manning. lacks a coherent economic rationale? The Asian economic crisis further delayed decision-making about energy security in the region. The negative synergy of excessive and misallocated capital flows; fixed exchange rates; and over-guaranteed, under-regulated and opaque domestic financial markets appears to have been the key factor that precipitated the crisis.

The Asian Energy Factor: Myths and Dilemmas of Energy, Security and the Pacific Future. New York: Palgrave. Masaki, Hisane. *Improving Energy Security in Pacific Asia: Diversification and Risk Reduction for Fossil and Nuclear Fuels*. Commissioned by the Pacific Asia Regional Energy Security (PARES) Project, December. Nemetz, Peter N., Vertinsky, Ilan, and Vertinsky, Patricia N.. 1984-1985. *Japan's Energy Strategy at the Crossroads*. In a provocative new book, *The Asian Energy Factor: Myths and Dilemmas of Energy, Security, and the Pacific Future*, Robert Manning, senior fellow and director of Asian Studies at the Council, examines the impact of burgeoning Asian energy demand on world markets, Asian energy choices, and regional security. The book challenges such current myths as the notion of dwindling global oil supply, the Caspian Basin as the new Persian Gulf, and the inevitability of military conflict as a result of modernization, economic buoyancy, and increased nationalism triggered by competition over energy resource *The Asian energy factor: myth and dilemmas of energy, security and the Pacific Fu.....*[Volltext lesen]. Download. *Asia's hunger for energy - Managing the global energy challenges*. Within the energy crisis, the rising prices for fossil fuels and the ongoing discussion about the effects of CO2 on the atmosphere, people search for alternatives to classic fuels. E-Mobility tends to get more important on the whole world. This paper will deal with the most ambitious country within this topic about electric cars: China. It will provide the reader with an outlook to future production and to future potentials. This chapter will close with a conclusion about the findings, we could generate about e-mobility from China to the world. Introduction.
