The global financial system is the worldwide framework of legal agreements, institutions, and both formal and informal economic actors that together facilitate international flows of financial capital for purposes of investment and trade financing. Since emerging in the late 19th century during the first modern wave of economic globalization, its evolution is marked by the establishment of central banks, multilateral treaties, and intergovernmental organizations aimed at improving the transparency Review Money Economy protocol, troubleshooting and other methodology information | Contact experts in Money Economy to get answers.Â Lasting from 90 years of market development of the financial system in Poland has been slowed down, when the fall of 2008 began cyclical reach the Polish echo of the financial crisis. In developed countries launched anti-crisis interventionist aid programs in relation to the financial system and pro-growth instruments interventionist aim of stimulating economic growth weakened significantly.Â Before the emergence of the global financial crisis in 2008, it was mainly investment banking that approved the excessive levels of credit risk and speculative, too high, overvalued valuations of securities on stock exchanges.
