Israel should not build its power by depriving the Palestinians of access to their fair share of natural resources. A Palestinian woman bathes her son with water from a tank filled by a charity inside their dwelling in Khan Younis in the southern Gaza Strip on July 3, 2017 [Mohammed Salem/Reuters]. The announcement in July of a water prices agreement between Israel and the Palestinian Authority (PA) has been hailed as a model of Israeli-Palestinian cooperation as well as a major achievement of the Trump administration's efforts to broker a comprehensive peace deal in the Middle East. Both the agreement and the process that yielded it, however, reveal a very different reality. *Water Conflict: Economics, Politics, Law and Palestinian-Israeli Water Resources*, by Sharif S. Elmusa. Washington, DC: Institute for Palestine Studies, 1997. xxii + 408 pages. Bibl. to p. 395. Index to p. 408. \$29.95. Elmusa states that the water conflict between the Palestinians and Israelis is related to the transboundary nature of water resources and their scarcity, and to decades of occupation. One of the key issues in the Palestinian-Israeli conflict is Israel's policy of restricting Palestinian access to water, while permitting Israelis and settlers ample supply of it. Elmusa identifies this maldistribution, or water "gap," as one of the key obstacles to a lasting peace, and offers plausible solutions that are rooted in international law and joint management.

The Arab-Israeli dispute is a conflict about land - and maybe just as crucially the water which flows through that land. The so-called Six-Day War in 1967 arguably had its origins in a water dispute - moves to divert the River Jordan, Israel's main source of drinking water. Years of skirmishes and sabre rattling culminated in all-out war, with Israel quadrupling the territory it controlled and gaining complete control of double the resources of fresh water. Any country needs water to survive and develop. In Israel's history, it has needed water to make feasible the influx of huge num Water consumption by Israelis and Palestinians reflects stark inequalities. Due to the allocations of trans-boundary water resources agreed upon under Oslo II, Israel currently controls approximately 80% of water reserves in the West Bank. Military conflict in Gaza in the summer of 2014 left over a million residents without access to water.
