## **The Virtual Reality Construction Kit** Joseph D. Gradecki

Shows people with nonprogramming experience how to actually build hardware and software, combining them to create their own virtual reality projects for \$100 or less. Tells readers how to buy or build 3-D goggles, Power Gloves and build other necessary equipment inexpensively from scratch. Explains how to modify the programs on the accompanying disk to create other virtual reality activities and includes software tools to do so.

Import fully formed assets, including sophisticated compositions that you make with the Reality Composer app, or build them from meshes, materials, and textures. Place audio sources in the environment. Animate objects, both manually and with physics simulations. Respond to user input and changes in the environment. Synchronize across devices, enabling group AR experiences. Topics. Essentials. class ARView. A view that enables you to display an AR experience with RealityKit. Other areas where virtual reality could impact construction in the future includes safety training and equipment operator training. Workers could get exposure to environments such as confined spaces or working at height. VR simulators have been used for years to train soldiers, pilots and surgeons and could be used in the same way to train workers on everything from operating cranes and excavators to doing welding and masonry work. Oculus started out on the crowdfunding site Kickstarter and two versions of their developer kit was made available for early adopter to start testing and experimenting with applications for the AEC industry. Oculus was acquired by Facebook for \$2 billion back in 2014. The Oculus Rift will also require a PC with high-end specifications to run the headset. Virtual reality tours boosting real estate and construction markets worldwide. I change into an elegant VR headset covering half of my face, grab a hand controller and set off for an interactive virtual reality tour throughout my apartment-to-be. I can look around the kitchen, pop in the bedroom, turn the lights on, rearrange the wineglass on a dining table, move around the sofa in the living room, tone down vibrant upholstery, check that beautiful view outside. The technology is actively used for modeling and demonstration of interiors and real estate objects and mainly resides in developers' sales offices. Virtual tours assist buyers to judge the apartment layout, the view from their expected residence and even furnish the rooms.
