

Planting Arrangement in Organism's Habits Landscape Design Analyses Investigation and Discussion

LI Maocai

And union author gardens many years engineering design carries out the main body of a book, definition , planting arrangement method and aesthetics principle time the organism's habits landscape design having designed that principle , organism's habits landscape design expound detailedly to aspect such as planting arrangement way , art technique of expression from organism's habits gardens, the angle having been in progress to problem produced beneficial result and should pay attention to by ecotype gardens middle plant kind choice from special field analyses investigation and discussion.

This Planting Design Sourcebook is the essential guide to developing phytophilic design sensibilities, as well as constructing design processes suitable for various situations, and deciding how best to manipulate plants for effective uses for humankind. phytophilic is a word Jean invented that means 'plant loving'. We hope you agree it is essential to appreciate the natural world, natural systems and plants in particular to be able to really engage with effective planting design. To be able to make good use of plants, a designer must learn the character and capabilities of plants; no
