Andrew Pollack, father of Meadow Pollack, a victim of the Parkland massacre, gave an emotional speech in front of President Trump at the White House February 21. Pollack was an unannounced guest at a listening session in the State Dining Room of the White House Wednesday, February 21, which called a session to discuss school safety, according to the New York Times. "I can't get on an airplane with a bottled water, but some animal can walk into a school and shoot our children," Pollack said after taking the microphone. "It's just not right and we need to come together as a country and work on what's important, and that's protecting our children in the schools. That's the only thing that matters right now." "I'm never going to see my kid again," Pollack said.

Andrew Pollack. Donald Trump stuns by embracing gun control as Florida students return to class. President Donald Trump has surprised lawmakers by embracing gun control measures that are tougher than usually supported by his party, as students returned to the site of America's latest horrific school shooting.
