World Energy Outlook Market Report Series World Energy Investment Special Reports Country Reports Policy Pathways Technology Roadmaps Energy Technology Perspectives. Home » Data & Publications » In recent years, demand for energy has surged. This unrelenting increase has helped fuel global economic growth but placed considerable pressure on suppliers buffeted by geopolitics, violent weather conditions and other potentially disruptive factors. The World Health Organization has been criticised for collaborating too closely with national health authorities and for not taking an unpopular stance when needed. Non-state actors. In 2016, after two years of negotiations, the World Health Assembly adopted a framework for the World Health Organization's engagement with non-state actors (FENSA) (17). However the new Director-General is taking over an organization with many organisational challenges, that is underfunded and must demonstrate that it can unite its member states to tackle global health problems. To achieve this, it needs a strong leader with political and diplomatic flair who can make necessary decisions even when these may challenge member states and staff.
