Documents. Learning to Think: Thinking to Learn - RSU ? - Learning to Think: Thinking to Learn - Complete Documents. Discovery learning - the idea that children learn best through doing and actively exploring - was seen as central to the transformation of the primary school curriculum. 'The report's recurring themes are individual learning, flexibility in the curriculum, the centrality of play in children's learning, the use of the environment, learning by discovery and the importance of the evaluation of children's progress - teachers should 'not assume that only what is measurable is valuable.' - According to Piaget's theory children should not be taught certain concepts until they have reached the appropriate stage of cognitive development. According to Piaget (1958), assimilation and accommodation require an active learner, not a passive one, because problem-solving skills cannot be taught, they must be discovered. Piaget's Stages of Cognitive Development. Kay C. Wood, Harlan Smith, Daurice Grossniklaus Department of Educational Psychology and Instructional Technology, University of Georgia. From his observation of children, Piaget understood that children were creating ideas. They were not limited to receiving knowledge from parents or teachers; they actively constructed their own knowledge. Piaget's work provides the foundation on which constructionist theories are based.
