The Academy Awards (or Oscars) is an annual award ceremony dedicated to honoring the cinematic achievements of the film industry. Each year, a statuette referred to as an Academy Award of Merit (commonly known as the Oscar) is awarded to those who have excelled. Oscars are awarded on the basis of 24 categories including Best Picture , Best Director , Best Actor in a Leading Role and Best Actress in a Leading Role and Best Cinematography . The Academy Awards, more popularly known as the Oscars, are awards for artistic and technical merit in the film industry. Given annually by the Academy of Motion Picture Arts and Sciences (AMPAS), the awards are an international recognition of excellence in cinematic achievements as assessed by the Academy's voting membership. The various category winners are awarded a copy of a golden statuette, officially called the "Academy Award of Merit", although more commonly referred to by its nickname "Oscar"
