As generally accepted methods of inquiry transitioned from philosophical reasoning to quantitative scientific inquiry in the latter half of the 19th century, Hermann Ebbinghaus built on Aristotle's foundation of the association of ideas by conducting the first recorded experimental studies of memory.[1] His desire was to go a step farther into the workings of the mind. As generally accepted methods of inquiry transitioned from philosophical reasoning to quantitative scientific inquiry in the latter half of the 19th century, Hermann Ebbinghaus built on Aristotle's foundation of the association of ideas by conducting the first recorded experimental studies of memory.[1] His desire was to go a step farther into the workings of the mind and to submit to.
