Madan Mehta, Diane Armpriest, Walter Scarborough. The authors have combined their diverse professional and educational backgrounds to produce a resource that presents the complexity of building construction in an accessible volume. It clearly provides the basics of building science as applied to the art of transforming materials and systems into constructible buildings. The book appropriately addresses each of the primary building assemblies - foundations, walls, floors, ceilings, and roofs - and how they join, seal and integrate with other components. The performance of building enclosures an... Madan L Mehta Ph.D.; Diane Armpriest; Walter Scarborough

Building Construction: Principles, Materials, and Systems. ISBN 13: 9780130494214. Building Construction: Principles, Materials, and Systems. Madan L Mehta Ph.D.; Diane Armpriest; Walter Scarborough. 4 avg rating (15 ratings by Goodreads).

Professor Armpriest's teaching and research interests are in architectural construction materials and methods, the expression of structure and materials in northwest regional architecture, architectural design, and the relationship between building systems and the natural systems and processes of the site. Madan Mehta, Walter Scarborough. , Diane Armpriest. really liked it 4.00 - Rating details. - 15 ratings - 4 reviews.
